DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 5 is rejected under 35 U.S.C. 102(b) as being anticipated by Evers et al. (US 6,873,200).

In regard to Claim 5 (as taught in Figure 3):

An electronic high frequency switch (1) with a field effect transistor (Q1) as the switching element, whose switching condition is controlled via the gate voltage (Con) fed from a gate voltage source (IN and V1) and is controlled by means of a control circuit between a switching on value (Sc) and switching off value (Sw), characterized in that the size of the gate voltage fed from the gate voltage source is selectable between a first voltage (Sc) and a second voltage (Sw) by a changeover device (switch between Sc and Sw) depending on the desired linearity or switching speed, wherein neither the first voltage nor the second voltage is a ground voltage (Sc and Sw neither are a ground voltage and Column 4: lines 3-8, 16-19).

Allowable Subject Matter

3. Claims 6-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
